

thermOcap®

Contractor-friendly 4" x 4" protective cover for exothermically welded anode connections. Pre-primed with adhesive for 1-step application.

NEW thermOcap® PC is a 4" x 4"

prefabricated assembly designed as a protective cover for exothermically welded leads to pipes and tanks. When pressed by hand into position over the anode lead wire weld, it forms a thick, highly resistant electrical insulation seal over the weld, the end of the lead wire and the surrounding area of the pipe or tank. pre-primed with an elastomeric adhesive and does not require a spray primer.

- Pre-primed for 1-step application.
- Elongated wire inlet allows the cap to conform easier to the pipe
- Outer shell designed to prevent crushing
- Butyl rubber filled dome
- Easier field application
- Contractor friendly
